Truly Wholesome

A baking powder may be a fairly efficient leavening agent and yet contain ingredients that make it un-wholesome. If you use any baking powder containing alum, food products baked with it are apt to have a bitter taste, and, according to scientists, will not be good for the health. Fat better to use a truly wholesome baking powder, even if it does cost a few cents more per can.

Magic Baking Powder "contains no alum"

Nor has it any other hannful ingredient. It contains only phosphate, starch and soda—all of the very finest grades, experily blended. It never adds a bitter taste to the nice things you bake, but makes them light, white and truly wholesome. Insist on "Magic" and refuse all substitutes.
